What Are Sex Hormones? Dr. Randolph Explains

Most people know that the hormones, estrogen, progesterone, testosterone, and DHEA play important roles in human reproduction. What you may not know is that they also help regulate many other functions in the body, from sleep patterns, to your moods and memory, bone growth, muscle strength, and much more. To understand the many negative effects of an unbalanced hormone ratio --

the most common of which is the condition of estrogen dominance, where there is too much estrogen relative to progesterone -- it is important to understand how these hormones work inside the body. [LEARN MORE](#) about how these hormones regulate your body's many systems!

Happy Mother's Day 2017!

From all of us at the Ageless & Wellness Medical Center, we wish all our mothers, sisters, daughters, and friends a very lovely Mother's

Day! We are proud to be your healthcare providers, and strive to give you our best at every visit. Thank you for trusting us with your health!

Fight Hair Loss!

With hair loss affecting more than 56 million male and female Americans, it is no surprise we are in great need of a powerful tool to fight this problem. After countless hours of research and formulating, a new hair loss treatment is now available at Dr. Randolph's Pharmacy. **Fin Plus** combines the only FDA

approved oral prescription medication for hair loss, *finasteride*, with two well documented hair loss remedies, *biotin* and *astragalus*.

Together this trio utilizes three proven modalities to fight hair loss! If you are suffering from thinning hair and want a new approach to an age old problem, contact your physician at Dr. Randolph's Ageless and Wellness center today and ask if a prescription for **Fin Plus** is right for you!
